How to tell a Supra model

On the chassis plate
(under the bonnet on the left hand side)

V = SZ or RZ-S
S = SZ-R
Q = RZ
Z = GZ

A = Standard Differential
B = LSD

- | | |
|------|---|
| (1) | All UK cars are full leather, choice is between black or cream. Leather is an option on some J-Spec cars but is only available in black |
| (2) | UK traction control is different to J-Spec version... but both are equally poor |
| (3) | Twin gloveboxes fitted as standard - optional passenger airbag replaces upper glovebox. |
| (4) | 17" wheels available as option on all J-Spec models from 1994 onwards |
| (5) | REactive Absorber System |
| (6) | Introduced late 1997 - some early 1997 cars will be facelift but won't have the VVTi engine |
| (7) | Facelift models get an updated ABS system |
| (8) | Definitely on GZ, GZ Aerotop and UK models. Fitment to RZ and facelift SZ-R is based on my interpretation of original Japanese-text sales brochure. |
| (9) | Revs, speedo and fuel/temp |
| (10) | Revs, speedo, fuel/temp, boost and battery |
| (11) | Integrated into the rear light clusters |

- | | |
|----------|-----------------------------|
| X | Standard fit |
| O | Toyota factory option |
| | Not available on this model |

The following were optional on various models but are not shown

- | | |
|---|---|
| 1 | CD/Radio/Speaker setup as so many people change it anyway. The only significant point of note is that the GZ is the only model with an extra subwoofer behind the rear seats. |
| 2 | SatNav system as it's in Japanese and can't be changed to English so most people take it out anyway |
| 3 | Three or four spoke steering wheel - these appear to follow no logical pattern. The UK and GZ models should definitely have the four spoke wheel, and facelift cars should have the three spoke wheel only... but could have the four spoke. Pre-facelift cars seem to be even more of a lottery. |
| 4 | Stiffer suspension - J-Spec owners could also specify a stiffer suspension setup, but information about which models it was available on is practically non-existent. It was definitely available on the RZ, but beyond that... guesswork. |

This file was created on the 17th October 2005 by Aerotop Dave and was last updated on the 10th February 2006 by mawby. It should not require any further updating as it should remain largely relevant in the future.
